J. V. BAILEY'S
HARDY NURSERY STOCK
DAYTON'S BLUFF STATION
ST. PAUL MINN.

TO THE GROWER:

With the increasing demand for fruit you can make no mistake in buying nursery stock this spring, providing the stock is reliable and you are able to obtain varieties that are adapted to the climatic conditions of your location. Many varieties that prove successful in some localities are a failure in others.

NOW, MORE THAN EVER BEFORE, the grower should know that he is investing his money and spending his time in varieties that are adapted to our northwestern climatic conditions, and not on novelties or untried new varieties that some nurseryman or agent desires to sell at a high price.

I grow and offer for sale, only varieties that have been tried out and recommended by professional fruit growers of Minnesota and then tried out to my own satisfaction on my fruit farm at Newport, Minn.

Formerly I have propagated twenty-five or more varieties of strawberry plants but have eliminated many of these and now offer you only the very best to grow in Minnesota and surrounding states.

My evergreens, shade and fruit trees and flowering shrubs, as well as fruit plants, are grown in my nursery at Newport.

Price of nursery stock may seem high this year compared to prices of other things but one must take into consideration the fact that during the war period there was a small amount of nursery stock propagated, on account of scarcity of labor and extreme difficulty in securing the propagating stock that is imported from foreign countries. Nursery stock will be scarce for several years on account of these reasons.

My prices are as low as is consistent with the propagation of first class nursery stock.

A satisfied customer is my best advertisement.

J. V. Bailey

J. V. BAILEY, NURSERYMAN

Following is a list of nursery stock, with prices for spring delivery. These quotations are f. o. b. St. Paul, or at nursery, excepting where otherwise stated.

PURE-BRED STRAWBERRY PLANTS

The crop of Strawberry plants is very light owing to the fact that last season was dry and unfavorable to the development of new plants. My supply is limited. The plants, however, are well rooted and full of vigor. My prices are reasonable, considering the small crop of plants.

Everbearing Varieties

The everbearing strawberry is fast taking the place of the June bearing varieties as they produce fruit abundantly the same season that the plants are set, then produce a good crop of fruit the following spring. They are not subject to the effects of the strawberry weevil, which destroys so many June bearing patches. The two varieties which I offer are very hardy and are the most popular of the everbearing.

PROGRESSIVE—Staminate. Very productive. Fruit medium size and of excellent quality. Produces fruit from about a week earlier than any June variety until late fall. Price, 75c per dozen, \$1.25 for 25, \$2.25 for 50, \$4.00 for 100. Postage paid.

SUPERB—Staminate. Fruit very large and attractive. While this is one of the best everbearing varieties I consider it the best June bearing variety also. I usually grow a heavy crop of this variety in the fall and the following spring the same plants produce an immense crop of excellent fruit. Price, 75c per dozen, \$1.25 for 25, \$2.25 for 50, \$4.00 for 100. Postage paid.

June Bearing Varieties

MINNESOTA, formerly known as Minnesota No. 3—Staminate. This new strawberry is the result of a cross between Senator Dunlap and Pocomoke and in some ways resembles the Dunlap, but is far superior as it produces a larger fruit and is a much heavier yielder. The fruit has attractive, glossy appearance which is one of Dunlap's features. The plants are larger and the roots longer than the Dunlap which accounts for its better drought-resisting qualities and the long season of fruiting. Try the Minnesota and you will be well pleased. Price, 25 plants 75c; 50 plants, \$1.25; \$1.75 per 100; \$10.00 per 1000.

MINNETONKA, formerly known as Minnesota 935—Staminate. While this is one of the newer productions it has been tried out enough to be placed among the best varieties. Fruit is very large, season of ripening late. Plants very hardy. I consider this our best late variety. Price 25 plants 75c; 50 plants \$1.25; \$1.75 per 100; \$10.00 per 1000.

GIBSON—Staminate. Early. Price, 25 plants 75c; 50 plants \$1.25; \$1.75 per 100; \$10.00 per 1000.

SENATOR DUNLAP—Staminate. Medium. Price, 25 plants 75c; 50 plants \$1.25; \$1.75 per 100; \$10.00 per 1000.

J. V. BAILEY, NURSERYMAN

ASPARAGUS

CONOVER'S COLOSSAL, COLUMBIAN MAMMOTH WHITE—Two year old roots—\$2.00 per 100; \$10.00 per 1000.

RHUBARB OR PIE PLANT

MAMMOTH VICTORIA—Divided roots, 20c each; \$1.25 per 10. For larger quantities I will quote prices on application.

CURRENTS

The following varieties have all proven excellent in my fruiting field. They are far superior to the old varieties, which I have discarded.

LONG BUNCH HOLLAND, POMONA, WILDER, RED CROSS, DIPLOMA, LONDON MARKET, CHERRY CURRENT, BLACK CHAMPION CURRENT AND WHITE GRAPE CURRENT—30c each; \$3.00 per dozen; \$20.00 per 100.

RED RASPBERRIES

I have discarded everything in raspberries but the two following described varieties as they promise to be the coming varieties for the Minnesota grower.

LATHAM, formerly known as Minnesota No. 4— This berry has become so well known that is not necessary for me to describe it here. Price, 10 plants \$1.00; 25 plants \$2.00; 100 plants \$7.00; 1000 plants \$45.00.

REDPATH—In introducing this new raspberry for the first time, I feel that I make no mistake in recommending it to my customers as an unusual berry with superior qualities. This is the berry you have been looking for. Fruit a bright red, firm and very large, a heavy yielder and perfectly hardy. This variety does not seem susceptible to the diseases common to the red raspberry. If you want the best, do not fail to order some of these plants. Price, 10 plants \$1.50; 25 plants \$3.00; 50 plants \$5.50; 100 plants \$10.00.

BLACKBERRIES

SNYDER—Price, 10 plants \$1.00; 25 plants \$2.00; 100 plants \$6.00.

GOOSEBERRIES

THE CARRIE—The best gooseberry to grow in Minnesota. 30c each; \$3.00 per dozen.

GRAPES

BETA—This grape has become very popular as it is early, very productive and does not require covering in the winter as it is as hardy as the wild grape of Minnesota.

HUNGARIAN—This is a hardy grape that produces a larger fruit than the Beta but is a slower growing vine and probably not so productive.

CONCORD—This variety is very well known.

WHITE NIAGARA—A large variety of the white grape.

CAMPBELL'S EARLY—A very good grape of the purple sort.

Price of any of the above, 50c each; 10 plants for \$4.00.

J. V. BAILEY, NURSERYMAN

APPLE TREES

WEALTHY, DUTCHESS, PATTEN'S GREENING, OKABENA, PEERLESS, HIBERNAL, McINTOSH, MALINDA, SCOTT'S WINTER, YELLOW TRANSPARENT, STRAWBERRY CRAB, VIRGINIA CRAB, WHITNEY CRAB—5 to 7 ft. trees, three years old, \$1.00 each; \$10.00 per dozen; \$75.00 per 100. Six year old trees, too large for shipping, \$1.50 each; \$15.00 per dozen.

PLUMS

DE SOTO—Three-year-old trees, four to five ft., \$1.00 each; \$10.00 per doz.
HOMER CHERRY—\$1.00 each; \$10.00 per dozen.

FLOWERING SHRUBS

SPIREA VAN HOUTI, SYRINGA, SNOWBALL, HYDRANEA (PANICULATA), HONEYSUCKLE (TARTARIAN)—Medium size plants, 50c each; large plants, 75c each.

HEDGE PLANTS

BUCKTHORN, BARBERRY (*Thunbergii*) 30c each; \$2.50 for 10 plants; \$20.00 per 100.

HARDY PERENNIAL PLANTS

PEONIES—White, pink and red, divided roots, 30c each.
IRISES—Blue, 20c each; \$1.25 for ten.
PERENNIAL PHLOX—25c each; \$2.00 for 10.
BLEEDING HEART— 50c each.

EVERGREENS AND SHADE TREES

COLORADO BLUE SPRUCE—3 to 5 feet, three times transplanted, \$2.00 to \$7.00, according to color of foliage and individual specimen; 1½ to 2 feet, \$1.00 to \$2.00. I have a fine lot to select from.
NORWAY SPRUCE—Three times transplanted, 3 to 4 feet, \$1.00 each; 4 to 5 feet, \$1.50 each.
BLACK HILL SPRUCE—A very fine lot to select from, 2 to 3 feet, 75c to \$1.50 each, according to specimens.
RED CEDAR—4 to 6 feet, \$2.50 each.
ARBOR VITAE—12 to 18 inches, 50c each.
WHITE ELM—Ten to fifteen feet, \$1.00 to \$3.00 each, according to individual specimens.
WHITE BIRCH—5 to 15 feet, \$1.00 to \$3.00 each.
SOFT MAPLE—Twelve to twenty feet, \$2.50 each.
Will quote prices on evergreens or shade trees in quantities on application.

HUBBARD SQUASH SEED

Ounce, 25 cents, ¼ pound, 50c; \$1.50 per pound.

MILLER'S CREAM MUSKMEKON SEED

Ounce 25 cents; ¼ pound, 50 cents; \$1.50 per pound.

J. V. BAILEY, NURSERYMAN

MY GUARANTEE AND TERMS

That all nursery stock herein quoted, is grown under modern scientific methods.

That plants are securely and freshly put up in damp packing material.

That all nursery stock is true to name and correctly labeled.

That certificate of inspection accompanies each shipment of nursery stock.

In no case will I be liable for more than the original purchase price.

Prices quoted in this price-list are f. o. b. St. Paul or at nursery.

Deliveries will be made daily to the different express offices in St. Paul and to the St. Paul post office.

Cash with order when stock is to be shipped, or will except one-fourth of purchase price in advance and ship goods C.O.D. for balance if preferable.

MINNESOTA AGRICULTURAL EXPERIMENT STATION

Office of State Entomologist

St. Paul, Minn., January 7, 1921

CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with Sec. 1 Chapter 206, Session Laws of 1913, the nursery stock and premises of The Bailey Nursery of Newport, Minn., J. V. Bailey, Proprietor, have been carefully examined by a duly authorized inspector and found apparently free from dangerously injurious insects and contagious plant diseases.

This certificate is good until November 1, 1921, unless revoked, and covers only stock actually on the premises when examined.

G. W. PEAKE,

Chief Deputy Nursery Inspector.

A. G. RUGGLES,

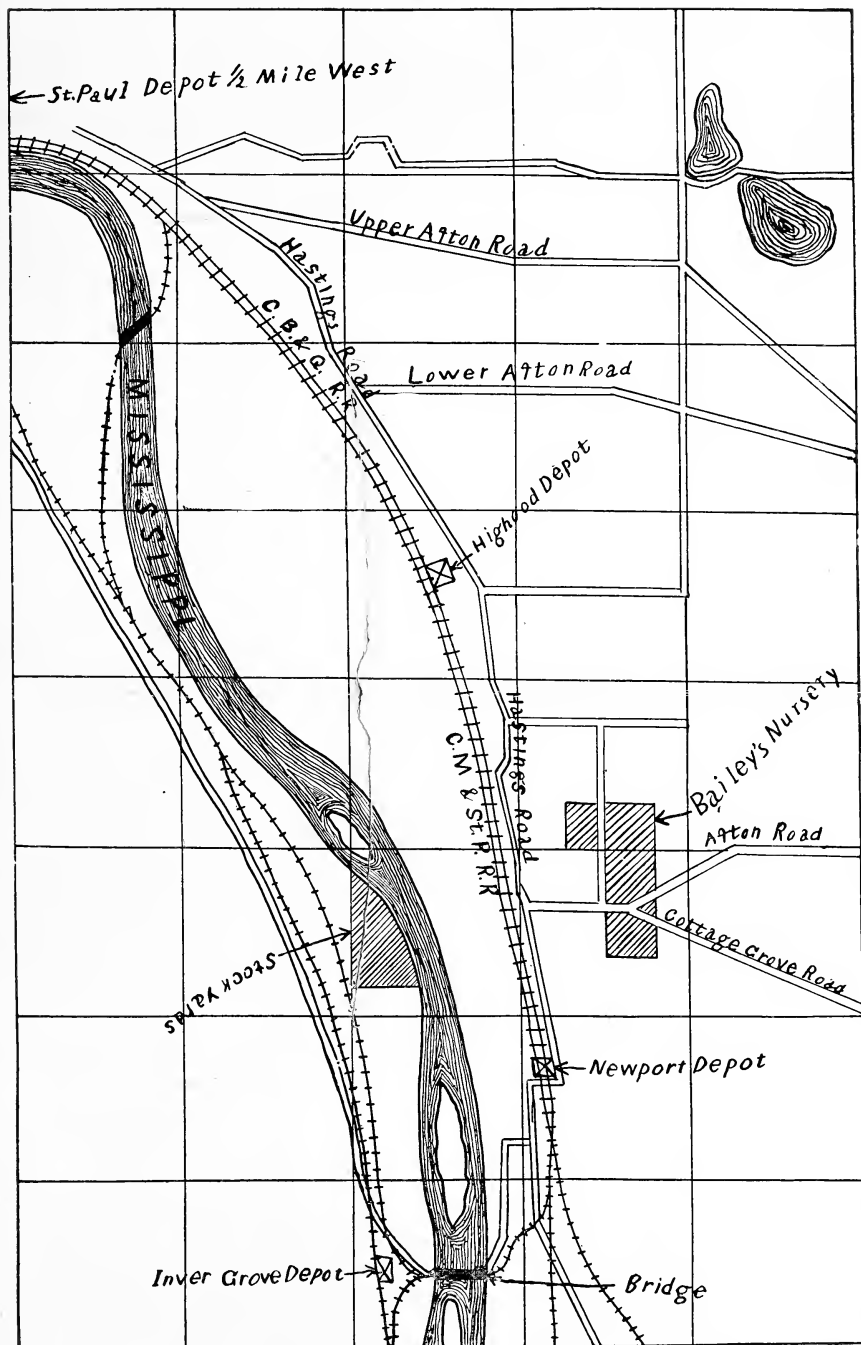

State Entomologist.
